

DuplicatorPlus™

Clone
Duplicate
Backup

DESCRIPTION

With DuplicatorPlus™ you can clone the image of most SCSI-based drives on to a CF card for backup purposes or for use in any of our SCSIFlash™ drives that use a CF card as the media. DuplicatorPlus can also be used to duplicate the image on a CF card on to a second CF card, a networked computer or the cloud.

Note, whereas 'copying' a hard disk's contents refers to copying individual files and folders, 'cloning' is a block-by-block transfer of the entire image, including hidden folders.

DuplicatorPlus can be used out of the box, as it is supplied with a power lead and the cables/adaptors needed to power and communicate with the SCSI drive being cloned. Cloning commences at the press of a button.

Also, if DuplicatorPlus is used with our Windows-based Flash2GUI™ memory management software, the following is possible:

- **Clone the image of a legacy SCSI drive in its entirety onto a CF card.**
- **Clone just that part of the legacy drive which is formatted.** For example, the host computer may have only formatted half of the legacy drive for use, in which case a lower capacity CF card can be used.
- **Copy (only) the data from one CF card to another.**
- **Clone the entire contents of a CF card onto another.**

Flash2GUI can also be used to set the functionality of the push button on the front of the DuplicatorPlus to perform any of the above. The software also comes with a command line version that allows actions to be automated.

BENEFITS

- **Ease of use.**
- **Multifunction.**
- **Compact and portable.**
- **Minimal system downtime to copy or clone.**

FEATURES

Functions:

- Clone, copy and duplicate.

Front of unit:

- Power On/Off button.
- 2x CF card slots.
- Operation control button.
- Ethernet port.

Rear of unit:

- 2 x 68-pin SCSI connectors.
- USB Type-A USB port.
- 5V/12V power lead.

SPECIFICATIONS

Dimensions (w d h): 205 x 265 x 65mm

Data transfer rate: >6Gb/min.

Supported devices: Most SCSI drives with 50-, 68- and 80-pin connectors.

Power: 110/240V AC.

DuplicatorPlus comes with:

- A 32GB industrial-grade CF card, but larger capacity cards are available upon request. Note, the target card needs to be at least as large as the legacy SCSI drive.
- 2m 5 and 12V cables to power the drive being cloned.
- 2m 68-pin male-to-male ribbon cable.
- 1m USB cable to connect to a PC or laptop.
- 5m 68-pin ribbon cable.
- 50- and 68-pin to 80-pin adaptor.
- 68- to 50-pin adaptor.
- Power cable.
